

Gold Crew SW[®]

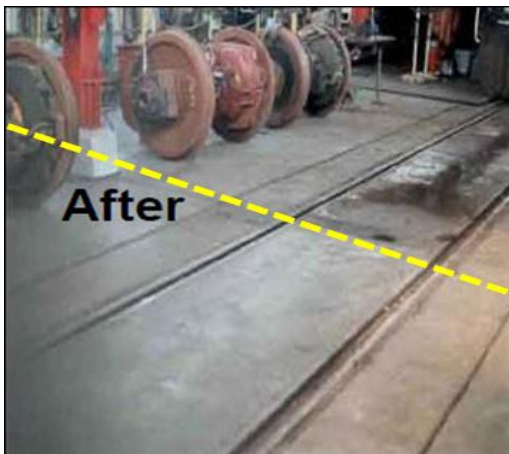

EPA NCP Listed Surface Washing Agent

Remediation of Petroleum Compounds including:

- ✓ Oil
- ✓ Fuels
- ✓ Hydraulic fluid

Advanced Features:

- ✓ Vapor Suppression
- ✓ Hydrocarbon Mitigation
- ✓ Biodegradable

SW is a water based, concentrated multi-purpose surface washing and spill response agent that is used to effectively and economically mitigate hazards and environmental impacts from a wide range of petroleum hydrocarbons from crude oil and gas to industrial paints and coatings.

The EPA prefers bioremediation over hazardous disposal or use of chemicals and detergents. Gold Crew SW micro-emulsifies petroleum hydrocarbons, making them bio-available for rapid biological degradation.

TERRADIS has pioneered the use of SW with TERMINATOR-HSD, a microbial product that degrades and removes stains from petroleum compounds.

Contact TERRADIS for a free Initial consultation about the use of SW to clean up your contamination on hard surfaces, soil or gravel.

Gold Crew SW is on the U.S. Environmental Protection Agency's NCP Product Schedule. This listing does NOT mean that the EPA approves, recommends, licenses, certifies or authorizes the use of Gold Crew on an oil discharge. This listing means only that data has been submitted to EPA as required by subpart J of the National Contingency Plan, 309.915. Always use this product in accordance with state, federal and local rules and regulations

✓ Safe ✓ Non-Toxic ✓ Biodegradable
